TECHNICAL DATA SHEET
March 1, 2003

DSC EXTENDER-75

Outstanding Characteristics:

Extends the practical use temperature of HEC Polymers by 75 to 100°F.

Compatible with all other common mud additives.

Non corrosive and non toxic.

Low viscosity liquid material which dissolves instantly in any aqueous fluid with minimal agitation.

Useful over a broad temperature range.

Description:

DSC EXTENDER-75 is a specially formulated additive which greatly enhances the thermal stability of drilling, completion and workover fluids containing HEC Polymers such as **DSC HEC LINEAR GEL** and **DSC VIS**.

Application:

30 to 40 gallons per 100 (42 gallon) barrels of HEC polymer pill.

Handling and Shipping:

Observe warning label on product container. Normal precautions for industrial chemicals apply.

Packaging:

DSC EXTENDER-75 is available in drums and bulk quantities.
