SUPER HOT STUFF

Outstanding Characteristics:

Non-flammable, Biodegradable, Versatile and Economical

Description:

Super Hot Stuff is a highly concentrated red liquid degreaser, formulated to attack heavy oil, greases, syrups, and adhesives. Biodegradable and water soluble. Super Hot Stuff is highly alkaline with a pH factor of 13.9 in concentrated form. When 1 part of this degreaser is diluted with 10 parts water, the pH factor is 11.8.

Designed for heavy-duty cleaning tasks, Super Hot Stuff can be used in cleaning machinery, valves, rig floors, engines, brick, concrete and synthetic oils. It easily removes soil and grease deposits. Used by the marine industry, Super Hot Stuff is an extremely effective bilge cleaner.

Application:

Super Hot Stuff may be used by spraying, brushing, or wiping. Dilution's will vary according to types of soils to be removed. Normal use is 2 oz. to 15 oz. of Super Hot Stuff per gal. of water. If use on painted surfaces. Super Hot Stuff should be diluted at least 1:20 with water.

Warning:

Corrosive. Contains Alkaline Material. Avoid contact with eyes and skin. Do not inhale or ingest. Read entire label before using.

Packaging:

Available in 5 gallon pails, 55 gallon drums and 550 gallon tote tanks.
