AMMONIUM CHLORIDE
Concentrate

Description:

AMMONIUM CHLORIDE Concentrate (NH₄Cl).

Application:

AMMONIUM CHLORIDE is used to prevent the hydration and migration of swelling type clays. **AMMONIUM CHLORIDE** can achieve a maximum density of 9.0 PPG. **AMMONIUM CHLORIDE** is readily soluble and easily mixed through the hopper.

Handling and Storage:

Store **AMMONIUM CHLORIDE** indoors taking special care to keep the material as dry as possible. Use normal handling precautions to minimize skin contact. Protective clothing, including goggles and dust mask is recommended. In the event of skin contact, wash with large quantities of water. For eye contact, flush with large quantities of water and immediately seek medical attention. **AMMONIUM CHLORIDE** is packaged in 50 lb. sacks.
