DSC OS-50
Oxygen Scavenger

Description:

DSC OS-50 is a sulfite-based oxygen scavenger for fresh water and low density packer fluids. **DSC OS-50** is utilized to reduce free oxygen in solids free packer fluids.

Application:

DSC OS-50 is used as an oxygen remover. It is more soluble in sea water and other brines than the powdered form. Recommended treatment is in a range of 10-15 Gallons per 100 barrels.

Packaging:

DSC OS-50 is packaged in 5 gallon pails.
