STEP II

Description:

STEP II is a highly concentrated green colored liquid detergent, specially formulated for the external washing of trucks, automobiles, tractors, farm equipment and other industrial vehicles.

STEP II is an excellent follow-up product to Step I, a liquid acid cleaner. **STEP I** is used on the tractor or truck itself and also on painted truck trailers. The two-step wash is used primarily on road equipment cleaning.

Benefits:

- ◆ Free-rinsing, leaves no residue
- ◆ Penetrates normal soils

Contains ingredients that ensure detergency effectiveness and water hardness control.

Application:

Desired method of application is with pressure washing equipment. **STEP II** may also be used for manual washing operations. Being highly concentrated, **STEP II** provides a very effective, yet economical solution. When used in a pressure washer, concentrations will vary from 2 to 8 oz. per gallon of water. Hot water will aid in cleaning. In an automatic car wash operation, concentration may be from 1 to 50 to 1 to 75. When used with **STEP I**, concentration of **STEP II** may be 1 to 75 or greater cut with water.

Packaging:

Available in a 5-gallon plastic pail, or 55-gallon metal drum.
